

**The 2011 Advances in Medical and Surgical Dermatology  
14<sup>th</sup> Annual Mount Sinai Winter Symposium  
Friday, Saturday and Sunday • December 9–11, 2011**

*Dear Colleague,*

*Welcome to the **14th Annual Advances in Medical and Surgical Dermatology** at Mount Sinai! This year's curriculum will give you the latest, exciting information on a wide range of dermatologic issues with lectures including both medical and surgical topics. Our faculty is comprised of nationally and internationally recognized authorities who are honored to speak to you about their areas of expertise this weekend. Please feel free to ask questions at the end of every lecture, during the round table discussions and breakfast sessions. You will receive a USB drive with the lecture paperless handouts in our efforts to protect the environment. You will earn up to 22.0 CME credits based on the days that you attend. Please remember to complete your evaluation online. A link has been provided in your folder. CME Certificates will be emailed to you upon receipt of your evaluation form. Our overall goal for this symposium is to share knowledge and practice pearls in order to enhance all of our dermatology practices. Please participate, interact with the vendors/exhibitors, meet new colleagues, give the course directors your feedback and most of all—enjoy! Thank you for coming to Mount Sinai's Winter Symposium!*

*Sincerely,*

*Ellen S. Marmor, MD  
Associate Professor, Dermatology*

*Gary Goldenberg, MD  
Assistant Professor Dermatology  
and Pathology*
