November 25, 2024

The holidays are a time for giving, celebrating, and spreading a little extra joy. This season, why not gift something that makes your loved ones feel their best? To help you find the perfect present, we asked our Haute Beauty experts to share their go-to recommendations for holiday gifting. Whether you're shopping for a skincare enthusiast, a wellness lover, or someone who could use a little pampering, these expert-approved suggestions are guaranteed to charm everyone on your list. So, let the holiday shopping begin and make this season one to remember!

Dr. Sam Rizk | Face | Upper East Side

In the skilled hands of NYC's renowned super-surgeon, the deep plane facelift is more than just surgery—it's pure magic.

Welcome to the world of luxury plastic surgery, a hidden gem on an unassuming stretch of Park Avenue, where Dr. Sam Rizk, a sculptor-turned-surgeon, reigns supreme. Here, newly lifted patients gaze at reflections they thought they'd lost, their youthful contours restored with the finesse of an artist and the precision of a surgeon. This is where scalpels become wands, time travel feels possible, and confidence—genuine confidence—becomes a power of its own.

Dr. Rizk's facelifts are meticulously tailored, honoring each patient's unique cultural and anatomical nuances to deliver hypernatural results that rejuvenate without compromising facial harmony. To complete this bespoke experience, patients may recover in one of three luxury hotels—the Lowell, the Aman, or the Carlyle—ensuring complete pampering and privacy. In just two weeks, they're ready to return to their lives, camera-ready and refreshed.

An invitation into Rizk's world is the ultimate gift of the season, a gateway to age-defying artistry and unparalleled refinement.
