Dr. Sam Rizk of Manhattan Facial Plastic Surgery blends his passion for art and medicine to deliver natural, sophisticated results in facial plastic surgery. Drawing from his background in fine arts and sculpting, he enhances each patient's unique bone structure, achieving balance and harmony through refined, individualized procedures.

A world-renowned pioneer and educator in rapid recovery deep plane facelift surgery, Dr. Rizk utilizes advanced techniques, including tissue sealants, to enhance precision and minimize downtime. He is also a leader in Piezo Ultrasonic Rhinoplasty, which uses sound vibrations to sculpt nasal structures with precision. These innovative approaches reduce trauma, bruising, and recovery time, offering patients a smoother healing process. Dr. Rizk's "less is more" philosophy ensures subtle, transformative changes that preserve cultural nuances and individual identity. His practice emphasizes thorough consultations, delivering results that celebrate natural beauty.
